The International Pharmacists for Anticoagulation Care Taskforce (iPACT) is an expert group committed to enhancing the key role that pharmacists play in anticoagulation management. Pharmacists are ideally suited to monitor patients in this therapeutic area; however, an assessment of their knowledge in providing consultations has not been formally evaluated.

The objective of this needs assessment survey was to identify self-reported gaps in competencies, variations in confidence between community and hospital pharmacists, and to examine the areas of anticoagulation with varying needs.
